

## Side to Side Seam on Garter Stitch

1. Line up your pieces with the right sides facing up. You will want to have them laid out on a table or other flat surface.
2. With matching yarn and a yarn needle, catch the top 'bump' of the first garter ridge on the piece on the right.

3. Catch the bottom 'bump' on the first garter ridge on the left piece.

4. Gently pull your working yarn. You do not need to tighten up the seam after every stitch. You can tighten it as you go along every inch or so.

5. Keep alternating between the right and left pieces always catching the same 'bump' on each side. You can chant bottom top top as you go along! (Isn't that catchy?)

You can see that this one isn't totally invisible. When you use matching yarn to make this seam though it will be very hard to spot!
