

To make an invisible seam when joining garter stitch pieces end to end:

1. With the right sides of your pieces facing upwards, put the pieces on a flat surface.
2. With a yarn needle and matching color yarn, catch the V found between the first set of garter ridges as seen in the diagram below.

3. Repeat step 2 on the bottom piece.
4. Alternate between the two pieces gently pulling the yarn to close the seam as you go.

Your seam will look like this before you tighten it up:

But then it will look like this:

Can you find my seam?? Even with using black yarn, it's invisible!
